Summary

Welcome to the Anaconda3 2024.06-1 Installer

Anaconda Distribution

is a free Python package distribution that includes:

- [conda](#) - a package and environment manager for your command line interface
- [Anaconda Navigator](#) - a desktop application built on conda, with options to launch other development applications from your managed environments
- 60+ of the latest data science and machine learning packages (and their dependencies) that install reliably out of the box

If you encounter any issues during this installation, please refer to our [Troubleshooting](#) page (search for ".pkg").

Software License Agreement

speed.

9. Cryptography A Python library. This exposes cryptographic recipes and primitives.

10. Definitions.

1. "Anaconda Distribution", shortened form "Distribution", is an open-source distribution of Python and R programming languages for scientific computing and data science. It aims to simplify package management and deployment. Anaconda Distribution includes: (1) conda, a package and environment manager for your command line interface; (2) Anaconda Navigator; (3) 250 automatically installed packages; (3) access to the Anaconda Public Repository.

2. "Anaconda Navigator" means a graphical interface for launching common Python programs without having to use command lines, to install packages and manage environments. It also allows the user to launch applications and easily manage conda packages, environments, and channels without using command-line commands.

3. "Anaconda Public Repository", means the Anaconda packages repository of 8000 open-source data science and machine learning packages at [repo.anaconda.com](#).

Version 4.0 | Last Modified: March 31, 2024 | ANACONDA TOS

To continue installing the software you must agree to the terms of the software license agreement.

Click Agree to continue or click Disagree to cancel the installation and quit the Installer.
